

Working Group Training and Education „AKA“

**Fachverband für
Strahlenschutz e.V.**

Für Deutschland und die Schweiz
Mitgliedsgesellschaft der IRPA
International Radiation Protection Association

Main Topics

- Innovative training and education tools, e. g. **virtual experiments**
- Elaboration of practice related documents such as „**Templates for Radiation Protection Instructions**“ or „**Advices for the performance of training lessons**“
- Support of **schools** and **universities**
- Definition of **objectives for learning** and development of a **catalogue with examination tasks**
- Preparation of **statements** and **publications** on current topics
- **Exchange of information** and maintaining contacts

From Practice – for Practice

Our Guiding Principle

We are committed to **scientifically based** und **practice-oriented training and education** in radiation protection. For this we are constantly working on an **effective** and harmonized **training concept**.

Additionally our concern is the **encouragement of young people** at schools and universities in order to **maintain professional competence** in radiation protection also for future generations.

Participants of the 97th AKA-Meeting in Dresden (October 2019)

Members and Collaborations

Members are:

- Training providers of radiation protection courses
- Employees of supervisory and approval authorities as well as
- Interested representatives from industry

The AKA successfully cooperates with various working groups of the Association for Radiation Protection as well as with societies and associations at **national** and **international** level.
